

# CGM Interpretation

## Workflow for medical offices

### For office appointment

MA/nurse downloads AGP\* as part of chart prep or the rooming process

Then attaches it to chart and/or provides hard copy to the provider

Provider interprets data

Office bills with 95251 plus 25 modifier with office visit code

### For patient call or portal message

That is connected to clinic with phone app

MA/nurse downloads AGP\* remotely

MA/nurse attaches it to chart and/or provides hard copy to provider

Provider interprets data

Office bills with 95251

That is not connected to clinic

Have patient bring reader/receiver into the office

MA/nurse downloads AGP\* in person, and if possible, sets up phone app for future downloads

\*An AGP, also known as Ambulatory Glucose Profile, is a report that summarizes the data from a CGM
