

THANK YOU!

FOR LEADING THE CHARGE!

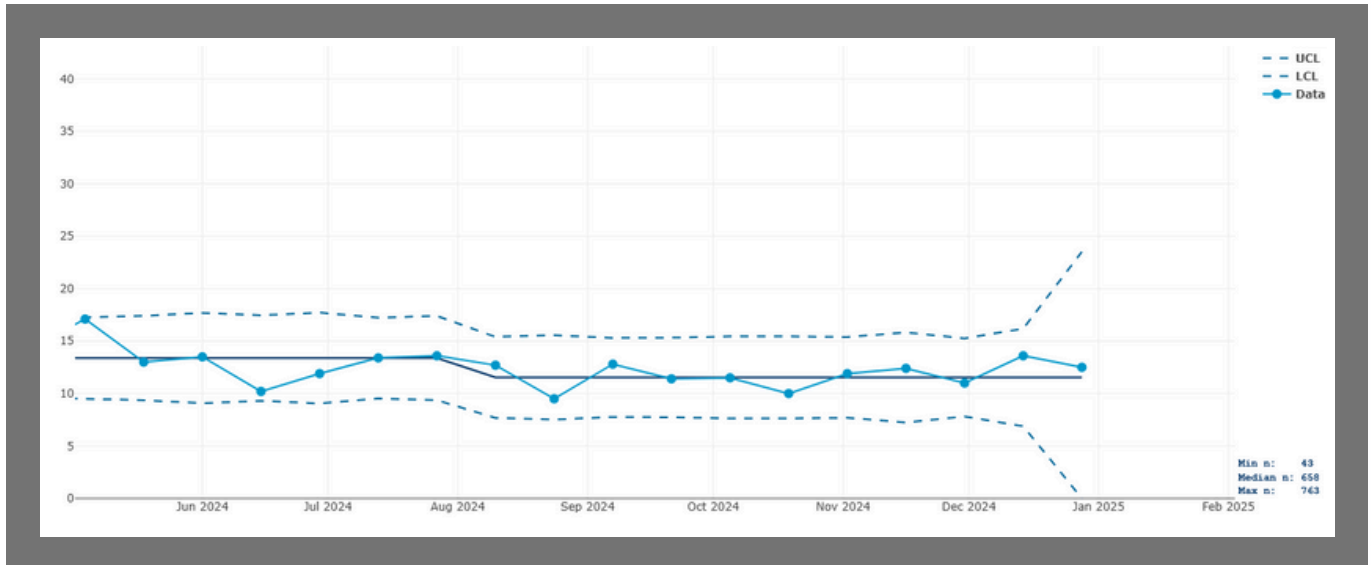

Figure 1. Run Chart Depicting Trend in Percentage of HbA1C >9% Among People with Diabetes from June 2024 - February 2025 in the Southeastern Ohio Regional Quality Improvement Hub

CGM Prescriptions

CGM prescribing has increased from a mean of 4.8% to 29.1%. Among adults with an A1C >9.0%, CGM prescriptions increased from a mean of 9.1% to a mean of 41.3%.

Improvement in A1C

The data show a downward shift, starting from an average of 13.4% to 11.5%.

Downward Shift

A "downward shift" indicates a pattern on a run chart where at least six consecutive data points fall below the median line, signaling a significant decline following an intervention, suggesting a successful quality improvement effort.

HEARTFELT THANKS

*"There is a down shift in % of patients with an A1C > 9%. We should take this as a victory and celebrate what this data shows... All of you deserve the full credit for this and **THANK YOU** for all you do!! **CELEBRATE!**"*
